

## **Joan Lurie**

### *Artist Statement*

Working in clay has allowed me to explore form itself, through the sense of movement and the spontaneous quality that working in clay allows for. In my ceramic works, the attempt to capture the beauty of raw clay, it's suppleness and malleability, has been a major focus. My ceramics have evolved through the give and take of working with the material and trying to find ways to capture the possibilities that are present in the process.
