

My work is that of a seeker, philosopher, poet, alchemist, priestess. I create forms that reflect transformation, transcendence, from mundane life to a sense of the sacred or mysterious. What are the catalysts that cause us to awaken, astonished, to our own aliveness? My work provides a small gateway into a feeling or an idea that is not quite tangible, but suggests a whole world just beyond the surface. Using visual languages that inspire awe, from mathematics, religion, and alchemy, to paradisiacal ideals and uncanny rituals, I transmute the material of everyday life into seeds of charged potentiality.
